Transaction dispatching protects the bottom line by routing each transaction to the most relevant acquirer who will accept the payment with the lowest processing fee, helping merchants to increase conversions while keeping costs down.

The solution also helps to protect valuable MIDs through the ability to distribute transactions, depending on their risk assessment. By providing a simple way to configure routing options based on optimized risk setup for different MIDs, ACI's dynamic payments routing solution offers an extremely powerful way to optimize costs, increase acceptance levels and, fight fraud effectively.

Our **smart retry** solution supports an enhanced customer experience and drives conversion rates by resubmitting failed transactions for a second attempt. By saving customers the time and effort of reentering their details, merchants can deliver excellent acceptance levels and enhanced service, protecting their reputation, supporting loyalty and keeping shoppers returning for more.

Our smart dynamic routing technology gives PSPs and merchants real flexibility and reduces operational costs while supporting increased conversions, an enhanced customer experience and sustainable sales growth.

ACI Worldwide is a global leader in mission-critical, real-time payments software. Our proven, secure and scalable software solutions enable leading corporations, fintechs and financial disruptors to process and manage digital payments, power omnicommerce payments, present and process bill payments and manage fraud and risk. We combine our global footprint with a local presence to drive the real-time digital transformation of payments and commerce.
